

Have you ever heard of **KINTSUGI?**

It's a Japanese technique for repairing broken pottery that inspires us to not hide scars that come from change and age, but to embrace the imperfect.

Sunday, March 22

Parish Hall, 1-3 PM

As we repair the pottery using the KINTSUGI technique, we'll also learn about the Japanese worldview of finding beauty in imperfection, known as **wabi sabi**. All materials, including pottery bowls will be provided; however, you are also encouraged to bring along pieces of your own that you might wish to use for this process.

We will be working with **epoxy glue** and **mica powder**. **Patience** is also a very important part of the process. *Although this event is designed for those twelve and older, there will still be fun as well as alternative activities for anyone under age twelve!* **Invite a friend to share this unique opportunity.**

It's free! Plus there'll be tea and sweets!
